puzzles, each measuring 60x60 cm and processed artistically will live side-by-side on a surface area of 5,500 sq.m. It will be included in the Guinness Book of Records having beaten the previous record set in China: Each piece of each puzzle has been produced in 100% recycled and recyclable materials. Until the big day in 2008, the objective will be to contaminate the world peacefully and joyfully with the pieces of the puzzle. Transporting fragments of

peace everywhere, to create aggregation and shared intentions. To promote the culture of reclaiming and recycling waste as a resource that can be returned to the cycle as a work of art and design, merchandise, material and even energy.
